

PRE-HOSPITAL CARE HUMAN FACTORS

Pre-Hospital Care Consultancy

Designed and delivered in conjunction with one of the World leaders in Human Factors (HBP Training). This one-day theory/practical course is designed for Front Line Pre-Hospital Care Providers at all levels. The course looks at how Human Factors (HF) affect your working environment and how we can use systems and processes to counteract the negative influences of this and improve clinical outcomes at day to day complex cases such as resuscitation and multi system trauma.

Clinical demonstrations of how Human Factors affect the Pre-Hospital environment.

Specialist theory delivery to understand Human Factors.

Student led clinical scenarios with Human Factor expert mentoring/facilitating.

Counts towards an advanced qualification for Clinical Supervisors/Managers (Coming soon)
